What is this product?

Type: The Fund is a fund for joint account (in Dutch: een fonds voor gemene rekening). It does not have a legal personality. It is formed by and comprises a contractual arrangement governed by the terms of the Prospectus between the Fund Manager, the Legal Owner and each Unit Holder.

Objectives: The Fund invests in the shares of publicly listed biotech / life sciences companies. It invests in highly innovative companies that develop and market new medicines and to a lesser extent diagnostics and/or medical devices. The Fund has a focused portfolio, investing in approximately 18 companies. Within this focus it will ensure that the portfolio is diversified over different diseases, development phases and geographical areas. The Fund's objective is to make an average minimum annual net return (after deduction of costs) of 20%+ over the mid-term (4-5 years).

Intended retail investor: A Well-Informed investor who either invests a minimum of EUR 500,000 (five hundred thousand Euro) in the Fund; or has obtained an assessment certifying its expertise, experience and knowledge in adequately appraising an investment in the Fund made by a specified entity.

Maturity: The term is unlimited.

This table shows the money you could get back over the next five years, under different scenarios, assuming you invest EUR 500,000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figure shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Privium Fund Management B.V. is unable to pay out?

The product's assets are held separately from Privium Fund Management B.V. A pay-out of the product's assets is thus not affected by the financial position or potential default of Privium Fund Management B.V.

The Legal Owner holds the legal ownership of the Fund Assets as required by law.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest EUR 500,000. The figures are estimates and may change in the future.

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

Investors have no right on redemption and the Fund Manager does not have or express any intentions to satisfy requests for redemptions within a given time schedule. However, the Fund Manager may, in its sole discretion but subject to the relevant provisions of the Terms and Conditions, redeem Participations at the request of an Investor.

Investing in biotech companies involves a high degree of risk and prices of the securities of such companies, especially of companies with a small market cap, may be volatile. Furthermore, there is concentration risk because of the biotech focus and a relatively concentrated portfolio. Therefore, a longer term holding period is recommended.
